Professional Summary

Quality-driven and fast learning professional seeking to assist with the success of the company mission. Highly attentive to detail and totally committed to tasks. Striving for the best environment possible through positive reinforcement and teamwork. Looking to begin a solid career in the web development field.

Technical Skills

- Agile Certified
- HTML5
- CSS3
- JavaScript ES6
- Trello
- JSON
- UX/UI
- Parcel
- Git
- Bash
- Firebase
- Repl.it
- Netlify

Continued Learning

Savvy Coders: A 12-week front end web development bootcamp program working in Object Oriented Programming, Functional Programming, Obtained Agile Certificate, HTML5, CSS3, JSON, Trello for project planning, UI/UX, Github, Gitbash, Netlify, Firebase for the Backend and API's

Capstone Project

- Built a single page application that allows users to search for the availability of seasonal beers from local breweries. This topic was chosen because it is a challenge for people to know which seasonal beers were in production at any given time. This project was built with the State Management approach with ES6 and uses Parcel to manage and display the State Object. I then use Firebase to grab API's in order to display the user's search criteria. <https://github.com/jdetjen7084>
