Continued Learning:

SavvyCoders 12-week immersive coding bootcamp learning the core concepts of Object-Oriented Programming, Functional Programming, HTML5, CSS3, JavaScript, JSON, Trello for project planning, UI/UX Concepts, Agile Certification, Single Page Web Applications, Firebase on the Backend.

Capstone Project:

A single page application that will allow veterans and their families to be able to understand, evaluate, and sign up for education benefits more easily. This page will also allow anyone to communicate with various organizations in order to volunteer their services to veterans. Volunteering for programs, such as, training a service dog, accompanying a veteran to medical appointments, or building houses for homeless veterans. Additionally, options will be available to volunteer to help veterans transitioning back into civilian life by assisting with resume editing, mock interviews, or one-on-one mentorship. Individuals will also be able to build a resume from this page.

Built by being styled and formatted with HTML and CSS, developed using JavaScript for functionality.

- Volunteers and patrons to be able to communicate with each other via API and set up appointments for meeting times.
- Individuals will be able to link and submit their resumes to job searching websites, such as, LinkedIn, Indeed, Monster.
- The goal is to create something that will provide a support system to help veterans and their families prepare for a future after the military.
