Professional Summary

Aspiring junior web developer with excellent communication and people skills, in addition to strong organization and time management. Currently making a transition from customer service to technology as a junior web developer. Completed an immersive coding bootcamp, Savvy Coders, where I learned the core principles of Object-Oriented Programming in JavaScript and how to build a SPA from scratch. Although I have graduated from Savvy Coders, I am continuing my education by taking a online Certified Scrum Master class. I also have an Agile Certification and I am ready to work in a team environment.

Technical Skills: Agile, Trello, JavaScript, HTML5, CSS3, and JSON

Internship: Washington University Lab Assistant (2019 - 2020) At Washington University I designed, maintained and organized wet laboratory activities. This included ordering supplies, reagent preparation, overseeing health and safety compliance, and keeping lab running efficiently. I individually directed one project and assisted with many others.

Continued Learning: Completing the Savvy Coders immersive coding bootcamp, learning JavaScript, HTML5, CSS3, JSON, UI/UX, Project Planning through Trello and Kanban, and Agile. I am in the process of learning scrum and I will be learning C++ in the fall during my studies at Fontbonne University.

Capstone Project: For my Capstone Project I made an inventory tracker for small business. This application keeps track of different types of inventory for different products. I aspire to continue working on this project for the foreseeable future. I plan to add on a personal login page and charts that show sales, current inventory, and future shipments.

Education:

Certifications: Agile and Web Development from Savvy Coders

Carnahan High School Graduate (with honors), with focus on Computer Science (HTML and CSS)
