Professional Summary:

Motivated full stack JavaScript developer, currently attending Savvy Coders Web Development Boot Camp. I would enjoy furthering my career in a development role where I'm challenged and excited to code every day.

Education:

Savvy Coders Full Stack Web Development Boot Camp – 2020 Agile Certification – 2020

Capstone Project: I'm extremely interested in Women's Health, so for my project, I decided to create a website that allows you to give doctors a rating. The website will allow users to leave a review about their experience with the doctor and rate them in the areas of caring, patience, listening, knowledgeable, satisfaction, environment, holistic approach, and timeliness. There will also be a "would you recommend?" section. Used JavaScript, HTML, and CSS.

Claim Academy Full Stack JavaScript Web Development, April - June 2020

I knew I needed a career trajectory for myself and my family. I heard about coding from a co-worker at GM and I learned about STEM in school.

- Became proficient in full stack JS development
- Created various projects using JavaScript

Projects

- Capstone called Equipped
- Built a full stack web app which allows users to rent their tools or equipment out to other users in the area. Using the MERN stack
- Also created a Calculator App, a Temperature Converter, and an Image Gallery

Technical Skills:

Full Stack JavaScript, HTML, CSS, GIT, React, MongoDB, Express, Node, Jest, TypeScript, SQL, ES 2016, Postman, Trello

Experience:

General Motors Assembly, 2016 - 2020

- Showcased leadership capabilities by communicating with team members to effectively complete the assembly of vehicles
- Responsible for building the 2019 mid-size truck of the year

Quik Trip Clerk, 2013 - 2017

- Demonstrated impeccable integrity and honesty that created a trusting environment with repeat customers
- Cross-trained team members by having 5 new stores in 3 states
