

Traci M. Black

(573) 327-1653

2015Tre@gmail.com

<https://www.linkedin.com/in/traci-black-0175781b6/>

Professional Summary:

My background consists of opportunities that are not IT related. I decided to make a career change to Information Technology to have more opportunities available to me. I like the intersection of technology and security. I joined the Savvy Coder Boot Camp to learn how to code.

Education:

Savvy Coders Boot Camp - 2020

Bachelor of Science Degree

University of West Florida

Pensacola, Florida

Technical Skills: JavaScript, HTML, CSS, Trello, Agile

Capstone Project:

My Project is a web application targeted toward Charity Organizations or Events. Organization or Event owners can use this website for marketing and fundraising, with a focus on fundraising. The website will allow them to self-publicize and gather donations directly via the website.

This page will hold links to several of these fundraising sites such as GoFundMe and Kickstarter. It will also organize and hold all of the documentation required to register and open accounts on these fundraising websites. It will be a "one stop" type of fundraising website.

An organization can use the website to keep track of their fundraising activities year after year. Instead of them having to look up each individual donor and fundraising entity, separately. This website will allow them to categorically organize and track their donation solicitations all one place.

Work Experience:

Driving:

2017 - Present
