---

## Professional Summary:

Professional with a technical, creative, and collaborative background in the wireless telecommunication industry. Studied coding in college and is now enrolled in the Savvy Coders Web Development Boot Camp. Has a burning desire to learn to code to bring software development work in-house and be able to liaise with developers. Currently, developing no-code and low-code PAAS software, such as Citrix Podio and Appsheet.

## Continued Learning:

Savvy Coders Web Development Boot Camp – 2020

Agile Certification – 2020

## Capstone Project:

Creating an application for Project Managers and Field Employees in the Telecommunications Industry. It will track cell site location, tasks, project duration, weather forecast, and data collections. The UI/UX is for Project Managers and Field Employees to enter updates and allow for data collection. It will have two view styles, which are List View and Map View, along with detailed view of each cell project. It will reduce the time and return of investment to various general contractor companies in the wireless industry. The technologies used to develop this application are HTML, CSS, JavaScript, Node.js, Express, and MongoDB.

## Experiences:

### Skynet, LLC

Nashville, TN

11/2017 – Present

#### Co-Founder

- As a General Manager, oversee all sales, operations, and coordinate with the Finance Manager.
- As an Account Manager, meet existing clients and prospect for new clients to build long term relationships for new opportunities and customers retention.
- Train new individuals with no experience, some with previous experience, and re-curing training to provide updated OSHA safety regulation for all field employees.

- Provide training to all new individuals or refresh field employees on how to operate and login to the BTS equipment, to check alarm status, and troubleshoot the equipment during a maintenance or upgrade project.
- Develop, document, and implement system and process for operations, sales, HR, and finance.
- Research and develop internal CRM and field service application using Appsheet No-Code Platform system by Google Cloud Platform and Cytrix Podio.

**Neticom, LLC**

Grand Prairie, TX

05/2013 – 11/2017

**Co-founder and Management**

- Responsible for managing operations for projects for wireless operators.
- Researched and developed a training process to new and experienced tower technicians to gain knowledge and work in a safe environment with progressive regulation changes.
- Supported field engineers and scheduled field BTS engineers for upgrade projects.

**Versacom**

Dallas, TX

08/2008 – 03/2013

**Supervisor, Lead Technician, and Fundamental Tower Technician**

- Installed cabling termination for TDMA and reconfigured x-alarms for UMTS.
- Acted as the Field Leader for various projects.
- Acted as the AT&T call tester project management for RNC upgrade.
- Provided war room support as the Ericsson Technical Lead.
- Learned to be a Nokia Integrator to turn up and test cell site after upgrades.
- Provided tower construction training: DBI Safety Training certificates.

**Education:**

Savvy Coders	Web Development	2020
Media Tech Institute	Recording Arts	2008
TCC (Tarrant County College)	Radiologic Tech	2006
