## Professional Summary:

Dependable Web Developer with superb communication skills, a great work ethic, and communication skills that gravitate toward working with others. I am currently making a transition from a College Soccer Coach to information technology as a junior web developer by attending an immersive coding bootcamp, Savvy Coders, where I am learning the core principles of Object-Oriented Programming in JavaScript and becoming Agile Certified. I am continuing my education by taking Udemy courses in JavaScript. Excellent employment track record for loyalty and longevity.

## Strengths:

- Exceptional organization and presentation abilities
- Strong creative and analytical problem-solving and troubleshooting skills
- Cooperatively works with others to produce and deliver quality work, even under pressure
- Articulate and very effective working with people of different backgrounds
- Ability to speak three languages
- Leadership and teamwork skills

**Capstone Project:** My capstone project is a recruiting application that provides a registration and recruiting platform for college coaches for every sport category. The recruiting planning process will become easier to manage by eliminating time consuming steps and enhancing features on the website. My application will be able to display the list of players that are registered in the database for any selected tournament. It will allow easy access to upload the tournament schedules so coaches can have the player's schedule in one platform. Before my application, coaches had to go through hundreds of emails to obtain player's profile information and then assemble this information to coordinate tournament schedule. In order to create this website, I used HTML5, CSS3, JavaScript, Trello, Mongo, Express, and Node.js.

## Education:

Savvy Coders - Web Development Boot Camp - 2020

Agile Certification - 2020

Lee University - Bachelor's Degree in Health Science (2010)
