## Junior Web Developer

Well-rounded junior web developer currently enrolled in Savvy Coders bootcamp with the goal of becoming proficient in web development. Currently transitioning from a field in industrial operations to web development.

Previous experience as a retail manager where organization and communication were a must. I also have experience in the construction and industrial fields where collaboration with others has led to smoothly completed projects and to exceeding goals and objectives.

## Technical Skills

JavaScript, HTML, CSS, Trello, Agile, MongoDB, Nodejs, Express

## Continuing Education

### Savvy Coders, 2021

Full Stack Web Development Boot Camp

Agile Certification

## Capstone Project

My Capstone Project is the creation of an app that will be a one stop place for monitoring the health of an in-home aquarium. Most people think that fishkeeping is as easy as water and food. However, there is a lot of maintenance that goes into a healthy aquarium. My app, Tankmate, will contain pages that help you track any changes, log cleanings and chemicals, upload photos, and share successes, failures, and helpful hints with others through a forum.

## Education

**Webster University**, St. Louis, MO

Bachelor of Arts - History 2020
